

-  4 LED DIGITS, 9mm HIGH
-  ANALOG 0-10V, 0(4)-20mA INPUT
-  10-30 VDC SUPPLY
-  48x24mm DIN PANEL HOUSING

## PRODUCT DESCRIPTION

ND-48AN miniature panel displays are designed for measurement and data presentation in wide range of industrial applications.

ND-48AN has process, isolated analogue inputs with possibility of read-out scaling and formatting.

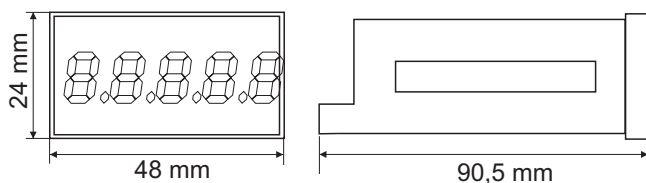

The display configuration can be easily programmed using back-panel push-buttons and on-screen menu. The user can set display format, brightness, analog input scaling and serial communication parameters.

ND-48AN enclosures are made from black ABS, according to DIN standard. Units description may be put in the special field right to the digits.

## Technical specification

LED display	4 digits, h=9mm
display color	bright red
display range	-999; 9999
analogue input	0-10V, 0-20mA (isolated)
input resolution	0,1%FS
accuracy	+/-0,3%FS
supply voltage	10-30 VDC
power consumption	2W
dimensions	48 x 24 x 90,5 mm
panel cut-out	44.5 x 21,5 mm
protection degree	IP-40 (front) IP-00 (rear)

ND 48

## Product marking:

**ND48 AN** - display with 0-20mA and 0-10V analog inputs
